

**8th International Congenital CMV Conference
&
18th International CMV Workshop**
28 March - 1 April 2022, Virtual

Dear Friends and Colleagues,

We are pleased to invite you to the 8th International Congenital CMV Conference & 18th International CMV Workshop, to be held virtually between 28th March and 1st April 2022.

Supported by our UK-based CMV colleagues in Birmingham, Cardiff, Glasgow and London, we plan a 5 day meeting with a full programme of invited speakers, oral paper presentations poster sessions and panel discussions. Additionally, there will be plenty of opportunities for networking and social interaction.

The first day of the conference will be a symposium day, consisting of eight invited “state of the art” presentations covering the following key themes: Congenital CMV, Transplantation, Innate and Acquired Immune Responses, Latency, Virus-Host Interaction, Vaccines and Antivirals. The following four days will cover two of these themes each day, encompassing keynote talks, offered paper sessions, panel discussions and poster presentations.

While it will be very sad that we will not be able to host you in person in Cambridge, we are determined to provide a high quality, lively and interesting scientific meeting that will allow the CMV research community to reconnect, to foster new collaborations and advance our research.

Yours faithfully,

Mark Wills John Sinclair Mike Weekes
University of Cambridge
